Everything Can Happen In Space

What kind of space is this?

It's a place where anything can happen, where you can go in, make important calls, participate in video conferences, engage in intense discussions, engage in deep thought, and be insulated from the noise, it allows you to focus effectively on what is necessary, better promotes creativity and stimulates new ideas, and provides you with the ideal office space for the next step.

Designer.

Christopher Lim

Christopher Lim

Christopher Lim is the co-founder and designer with a Singapore company Integrated Venture Pte Ltd.

He designed office furniture products with good technical & versatile features giving added benefits to end users. The products include room wall partitions for offices, full range of fixed or mobile office open plan or enclose workstations, partitions and customized product design. He is the lead designer for the TELEHAUS pod series. The TELEHAUS a mobile pod that provide users a quiet place for virtual, online concentrated interaction with customers or meeting within offices and a portable virtual training center for individual or groups online teaching and a quiet studying place for teachers and students interaction.

TELEHAUS pod are finished with multi selections of fabrics for the wall panels and double-glazed glass door & wall panels for the exterior and selected materials for the interior to give a good and effective sound insulation for voice calls and video conferencing. The design of this TELEHAUS pod has good feasibility and versatile of sizes that can be easily reconfigured to longer room size for the larger model.

About Frontway.

Front way is a young and creative design agency dedicated to creating both artistic and practical furniture design. Unique design thinking and years of design experience are their advantages. "Love, open, free, curious" is the reason front way always maintain high standards of design production.

Office Space

Noise in open-plan offices is a major barrier to happiness at work, often interrupted by phone calls, meetings and discussions. And the way we work and how we work is changing rapidly, and what works in open-plan offices doesn't work in multipurpose Spaces. Once we start working side-by-side with AI, any new ways of working digitally that we learn will become obsolete. So noise reduction is, and will be part of the solution to happiness in the workplace.

"CURIOUS"

Is The Reason Frontway Always Maintain
High Standards Of Design Production.

OFFICE &SPACE

Intelligent sound-proof cabin suitable for office space breaks the limitation of closed office space in the past, responds to the mobility demand of open space in a deeper level, becomes one of the emotional links between employees and office, and provides comfort for employees' work behavior and physical and mental health as well as the well-being of corporate culture. We look forward to more people can use such high-performance products to improve the employee's office experience, so as to achieve higher performance results and help the success of the enterprise.

Make Space Meaningful

It's the perfect soundproof place for important one-on-one private conversations, brainstorming, and not interrupting a colleague at work, ideal for an important phone call or videoconference. Discuss in private, without disturbing your colleagues. The soundproof cabin provides a sound-free and comfortable working environment.

Nearly Perfect

Unusual design,
Can always bring you the feeling of heart,
Frontway Intelligent sound insulation cabin,
It leads you into an extraordinary world.

Recorded Space

Recording Series Intelligent Sound Insulation Cabin provides advanced sound solutions, allowing you to record and play in a comfortable environment. Flexible quick loading mode can be arbitrarily placed in the space, which is a convenient and flexible choice!

Easy Fit.

The Frontway Smart Sound Insulation Cabin can easily be paired with a personal audio space. Own it doesn't mean you can compete with a multimilliondollar professional audio studio, but what we can do is create a very practical, sound-neutral environment that will help users gain unique listening space or audio working conditions.

Recorded Space

Recorded when required by the work environment is quiet and not by the outside noise interference, Frontway intelligent sound insulation tank recorded series provides advanced sound solutions, built a quiet working environment, to work in a comfortable environment.

Intelligent Entrance Guard

Intelligent access control can be connected to the management system of attendance appointment, easy to remote control and management, in the security performance of the above has a great improvement, based on the face recognition technology access control system, solve the card copy, card loss, card to forget to take traditional access card problems, in security at the same time to provide convenience.

Instrumental Music Space

Equipped with high-quality sound insulation system, the sound insulation room provides a quiet environment for users to create music to play, efficient sound-absorbing mode is very suitable for the team to create exchanges, let the sharing and presentation go on forever.

Ideal Space Creator

Frontway is committed to creating both artistic and practical furniture design, intelligent sound insulation is a sustainable high-quality material that provides the acoustic promise of a high-quality user experience. Users can choose to decorate in their own way, excellent sound insulation to ensure that you and your team complete privacy and create a pleasant working atmosphere.

Instrumental Space

Music Education is not only limited to the school curriculum, outside the school chain training institutions are more dynamic. But the sound environment of the instrumental music space, which has been neglected by us, directly affects the sound and color of instrumental music and the students' perception of pitch. Of course, the construction of the traditional instrumental music studio is not only the defect of the sound environment, the sound mutual interference and disturbs the people is outside the school music education place the most painful spot, the field adjustment change causes the entire construction investment to be naught. The powerful acoustic features of the Frontway Intelligent Sound Insulation Cabin come to life.....

Immersed in a strong | creative atmosphere

To Create A New Spatial Experience

Users can choose to decorate in their own way, excellent sound insulation effect to ensure that you and your team complete speech privacy and create a pleasant working atmosphere.

Education Space

While we value the health of our learning environment, perhaps we also need to be concerned about the privacy of our interactions with students, Front way of Education Space sound-proof room, opened the hearts of students, close the distance between parents...

Making The Most Of
A Small Space Is Great Wisdom

**Our Goal Is To
Create The Taste Of Work**
— Design front way

EDUCATION &SPACE

Modern education space is more and more spacious and transparent, large classrooms, activity areas, teachers' offices are all bright and open. While paying attention to the health of the learning environment, perhaps we also need to care about the privacy of communication and guidance with students. The soundproof and private point-to-point classroom guidance room is undoubtedly to meet the needs of homework guidance, criticism and correction, privacy and concentration of psychological communication between teachers and students. Similarly, when parents visit, conversations are no longer confined to the open office of a busy teacher or a noisy hallway. Frontway educational series of intelligent sound-proof pods, open the hearts of students, close the distance with parents...

Detail Analysis

Exquisite details provide great convenience for users

Easy installation

In order to achieve the best mute effect, the mute room has become very complex in structure. In order to make the user's installation more simple and convenient, the bottom of the product is equipped with high strength wheel feet, users can easily transfer the position of the product, the use of more flexible.

Flexible and convenient

Casters are horizontal metal adjustment wheels, a single load-bearing 80kg, adjustable height 10mm, high strength of the casters can allow users to easily move products, convenient space constantly change collocation, more flexible and convenient to use.

Traceless tacks

Fashion imitation cashmere fabric, soft and delicate, thick and compact texture, durable ball, pushpins can be easily stapled to the fabric, increase the cultural atmosphere, after taking the pushpins leave no trace.

Exquisite details

Built-in hook, can let the user obtain more convenient use. The maximum load-bearing capacity is 15 kg. Can hang clothes and hats, briefcase or backpack and other objects, bright colors, beautiful decoration.

Interior Layout

Different size, different layout, suitable for more different space and scene.

Model: B0128A
Size: 1100*1100*2195mm

Work alone, Privacy for phone calls

Model: B0128E
Size: 1300*1400*2195mm

Single-player recording room, suitable for online education and personal live broadcasting

Model: B0128B
Size: 2000*1500*2195mm

Independent working room, to meet the needs of individual independent work without disturbance

Model: B0128B
Size: 2000*1500*2195mm

Double independent desktop for two people to work together

Model: B0128B
Size: 2000*1500*2195mm

Suitable for four people business negotiation, private work discussion

Model: B0128C
Size: 2500*2500*2195mm

With a screen for business video display, video conference, remote discussion

Model: B0128C
Size: 2500*2500*2195mm

It is suitable for brainstorming and creative discussion, and for temporary meetings of many people

Model: B0128C
Size: 2500*2500*2195mm

Applicable to many business reception, and project discussion
